G-5, Nav Prabhat Society, Sant Janabai Road, Vile Parle East, Mumbai – 400057.

**Delivery-focused technology leader with 15+ years of experience driving execution excellence, cross-functional collaboration, and predictable delivery across product and platform teams. Experienced in enabling AI-powered workflows, automation systems, and intelligent product capabilities, while aligning business objectives with engineering execution across web and mobile platforms.**

## Core Competencies

---

- Agile & Hybrid Delivery Leadership
- Product & Engineering Execution Alignment
- Stakeholder & Client Relationship Management
- Delivery Planning, Roadmapping & Release Strategy
- Risk, Dependency & Change Management
- AI Workflow Automation & Orchestration
- AI Integration for Product & Platform Systems
- Intelligent Process Design & Operational Efficiency

## Professional Experience

---

### Digiture

*Jun 2023 – Nov 2025*

**Product Specialist** (Jun 2024 – Nov 2025)

**Sr. Project Manager** (Jun 2023 – Dec 2024)

- Led cross-functional delivery across engineering, QA, integration, and business teams ensuring alignment between product strategy and engineering execution.
- Contributed to the revival and modernization of an existing product, improving delivery structure and feature prioritization.
- Worked with teams developing an AI-based product, coordinating delivery planning, technical discussions, and execution milestones.
- Collaborated with product leadership to translate business initiatives into structured roadmaps, sprint plans, and release cycles.
- Introduced AI-assisted productivity workflows and automation for documentation, requirement analysis, and internal knowledge management.
- Facilitated product demonstrations, delivery reviews, and stakeholder updates to maintain alignment across business and technology teams.

## **PGH Consultancy**

*Dec 2024 – Present*

### **Project Consultant | Dec 2024 – Present**

- Advising technology startups and SMEs on delivery stabilization, product execution frameworks, and operational workflow improvements.
- Helping organizations establish Agile delivery practices, sprint planning structures, and execution governance models to improve development predictability.
- Designing AI-enabled workflow automations for internal operations, documentation workflows, and knowledge management systems.
- Supporting clients in identifying AI integration opportunities within their products, including AI-powered features, data workflows, and automation capabilities.
- Developing structured delivery dashboards and reporting frameworks to improve visibility, decision-making, and stakeholder alignment.

## **Axis Bank**

*Dec 2022 – May 2023*

### **Senior Manager – IT Projects | Dec 2022 – May 2023**

- Managed delivery of enterprise IT initiatives within the banking technology ecosystem, coordinating across internal technology teams, vendors, and business stakeholders.
- Oversaw project planning, execution tracking, and governance for programs supporting digital banking platforms and operational systems.
- Ensured compliance with internal governance standards, risk management practices, and regulatory requirements.
- Coordinated vendor engagements and technology integration activities across branch banking systems and supporting platforms.
- Monitored project progress, dependencies, and delivery risks while maintaining alignment with organizational timelines and regulatory commitments.
- Reported project status, delivery progress, and risk indicators to senior leadership through structured governance reviews.

## **Digiture**

*Sep 2018 – Nov 2022*

### **Project Manager | Sep 2018 – Nov 2022**

- Managed delivery of two product platforms, including one built from the ground up, coordinating product, engineering, QA, and integration teams.
- Ensured adherence to Agile methodologies, particularly Scrum, through structured sprint planning, backlog refinement, and retrospectives.
- Collaborated with stakeholders and product owners to define requirements, milestones, and deliverables aligned with product goals.
- Led requirement storyboarding and backlog planning to translate product vision into clear development tasks and sprint deliverables.

- Mentored development teams on technical challenges, development practices, and coding standards to maintain solution quality.
- Established standard operating procedures (SOPs) for client onboarding, support processes, and faster issue resolution.

## **Fulcro**

*Oct 2017 – Sep 2018*

**Sr. Developer – Platform** (Apr 2018 – Sep 2018)

**Sr. Dotnet Developer** (Oct 2017 – Mar 2018)

- Developed end-to-end features from requirement analysis through development, testing, and deployment.
- Collaborated with clients to translate business requirements into scalable technical solutions.
- Developed web platform integrations and cross-platform mobile applications to support client's product initiatives.
- Mentored developers and ensured adherence to coding standards and architectural best practices.
- Conducted research and built proof-of-concept (POC) implementations to validate client ideas and product concepts before full-scale development.

## **BCOD as Sr. Web Programmer**

*Aug 2010 – Oct 2017*

**Sr. Web Programmer** (Jul 2014 – Oct 2017)

**Web Developer** (Aug 2010 – Jun 2014)

- Delivered and maintained multiple web applications across diverse client domains.
- Coordinated between technical teams and business stakeholders to translate requirements into functional solutions.
- Contributed to project planning, effort estimation, and delivery tracking for development initiatives.
- Ensured application quality and reliability through structured development and testing practices.

## **Technical & Delivery Skills**

---

### **Delivery & Governance**

Agile (Scrum, Kanban), Hybrid Delivery Models  
 Sprint Planning, Release Planning & Delivery Tracking  
 Stakeholder Management and Cross-Team Coordination

### **AI Skills & Capabilities**

AI Workflow Automation and Agent-based Systems  
 AI Integration into Applications and APIs  
 Retrieval Augmented Generation (RAG) Concepts

Model Context Protocol (MCP) Concepts  
AI-assisted Application Development  
Content Generation and Knowledge Automation  
AI-driven Research and Analysis  
Image Generation Workflows

### **Technology**

.NET Core, ASP.NET, REST APIs, Node.js, .NET MAUI, React Native, React, Vue.js, JavaScript  
MySQL, SQL Server, PostgreSQL, AWS Cloud Services, CI/CD Pipelines and Deployment Workflows

### **Tools & Platforms**

OpenAI APIs / Codex, Claude / Claude Code, Ollama (Local LLM Execution), LLaMA Models,  
OpenRouter, OpenCode AI Development Tools, N8N Automation Workflows  
Git (GitHub & GitLab), Jira, Clickup, Slack, Notion, N8N Automation

## **Education & Certifications**

---

- Aptech Certified Computer Professional
- Advanced Diploma in Software System Analysis & Design
- Bachelor of Commerce – University of Mumbai

## **Accolades**

---

- Winner – Inter-Center Software Development Competition (Techno-Minds).
- Editor’s Choice Award – DotNetSpider Community.
